Chair: Eric Dominic Roessner, M.D., Ph.D., FEBTS
Department of Thoracic Surgery, Center for Thoracic Diseases,
University Medical Center Mainz

MAINZ EUROPEAN SCHOOL OF MINIMALLY INVASIVE THORACIC SURGERY

DEAR COLLEAGUES,

on behalf of the German Society for Thoracic Surgery (DGT), the Spanish Society for Thoracic Surgery (SECT) and the Department of Thoracic Surgery of the University Medical Center Mainz it is our honor and pleasure to invite you the 2025 series of the **MAINZ EUROPEAN SCHOOL OF MINIMALLY INVASIVE THORACIC SURGERY**.

According to the audience suggestions we will focus on more advanced topics which are highly relevant for junior independent to up senior surgical staff.

The first session in February will cover what is a topic relevant to all of us: the upcoming edition of the TNM system, we will continue with topic covering bleeding nightmares and how to prevent those and later this year we will have step by step tutorials for the most demanding procedures: complex segmentectomies.

Together with our panelist we are aiming for an intensive discussion with you, the audience.

Furthermore we like to welcome the Italian society (Società Italiana di Endoscopia Toracica) to the school, they are one of the many national societies endorsing this project.

We are looking forward to welcome you all to 2025 series of the Mainz School!

Do not hesitate to register – it is free of charge!

On behalf of the organizing group

ERIC ROESSNER, CARLOS GÁLVEZ AND RAFAEL ANDRADE

THE MAINZ SCHOOL AT A GLANCE:

TOPIC: Hot topics in thoracic surgery, step by step teaching of minimally invasive procedures uVATS lobectomies and segmentectomies, RATS procedures
